Created by Godrej Locks, crafted for the future.

With its advanced, pro-safety features, Spacetek Pro is a cutting-edge safety solution, conceived and created by Godrej Locks. Spacetek Pro comes loaded with dynamic functions, including a super sensitive touch, that offer a comprehensive safety system for your home. An immaculate coming together of design and engineering, Spacetek Pro is the futuristic answer to your safety needs.

Cutting-edge features for advanced safety:

360-Degree Fingerprint Identification.

Once registered, the sensor recognises up to 100 fingerprints at any angle.

Digital Keypad

Highly responsive keypad for seamless user experience. 4 to 12 digitals for enhanced password strength (register up to 4 unique pins).

Adjustable Spycode

In the presence of strangers, random numbers can be added before or after the passcode, thereby maintaining secrecy.

Low Battery Indication

In case of low battery, a beep sound will alert you in advance, reminding you to change the battery.

Privacy Function

If the privacy button is on, the lock can't be opened from outside by fingerprint or passcode but only with the mechanical key.

One Time Passcode

The One Time Passcode (OTP) / Guest PIN is for one-time use by a guest.

Passage Mode

Once switched on, the deadbolt function is disabled and only the latch operates.

Multi-level Volume Control

The adjustable volume control has 7 levels, including a mute function for silent operation.

Autolocking

When the door is shut, the 3 locking dead bolts automatically come out, thus eliminating manual locking hassles.

Break-in Alarm

An alarm goes off if the passcode is entered incorrectly 5 times in a row.

Sleek Body

The lock's outer body is sleek and is only 19.2 mm thick.

Emergency Micro USB

In case the battery is completely discharged, an external power bank can be used for emergency power supply to operate the lock.

Compatibility

The lock is compatible with the Remote and Video Door Phone for ease of operation.

Mechanical Key

In case of an emergency, the lock can be opened with the high-tech EXS mechanical key.
