HAFELE SHOWER ENCLOSURES

Introduction

Dear Customer,

Häfele has pioneered the way interior fittings are sold across the globe for many years now. Being a German company our foremost concern has always been to offer our customers products that are at the cutting edge of functionality and design; and backed by the highest standards in Customer Service. In our markets, we are increasingly being recognized as a one-stop interior specialist brand that can enable functionality for any interior design through a holistic solution offering, be it door hardware, furniture or kitchen fittings, sliding systems, built-in appliances, bathroom solutions, furniture lighting and interior surfaces.

We understand that homes are a reflection of the distinctive and unique lifestyle of any individual and this fact stands even taller when we consider the more intimate areas of home like the bedroom, wardroom or bathroom. This is why Häfele has always respected the need for individualistic choices that our customers may have and come up with the most exacting solutions for them, making every experience as unique and different as possible. Taking this proposition a step further, Häfele now offers you the choice to have the most intimate and personal shower enclosure in your bathroom that singularly meets your specific needs or requirements. Häfele's Shower enclosures can be chosen from a multitude of configuration options ranging from simple enclosures without doors to complex angular structures with swing doors or sliding partitions; offering an individualistic, bespoke design that truly represents a unique sense of style whilst realistically meeting the precise requirements of a project.

To the style and design possibilities of our shower enclosures, we bring the years of trust you have had in us for adding unmatched functionality (or as we call it "life") to your furniture and home applications - functionality, that is backed by true German quality and innovation! Being an expert in hardware, Häfele offers maximum assurance of performance for all the fittings and

components used in our shower enclosures, from the glass panels to the connectors and hinges or sliding gear (depending on whether the application has a swing or sliding door) to the seals and other accessories. Adding our range of shower fittings to this offering, we provide a holistic proposition that may be hard to resist.

So flip through the pages of this brochure and see the different possibilities that we can offer to redefine the design and functionality in your bathroom through our bespoke Shower Enclosure Solutions. You can get in touch with us to have a formal discussion regarding these solutions – our team of experts from the Specifications Department will hand-hold you at every stage of your project and ensure that you get exactly what you need.

Thank you,

Jürgen Wolf.
Managing Director
Häfele South Asia.

Hafele

Reassuring Expertise

"For over 9 decades, we've been helping people make more of their homes."

Established in Germany, and now operating worldwide, we specialise in the fittings, hardware and systems that improve the way your home, works. So when you choose our products as part of your new or reformed home, you know you're getting the benefit of extensive knowledge and decades of experience.

And we're still a family business, owned and managed by family members who really care about the products and service we provide. You can rely on our commitment to the highest standards of quality and reliability, founded on a long tradition of German engineering where attention to detail is second nature.

All our home improvement ideas are built to last – day in, day out – we want you to get the very best from every corner of your home, for many years to come."

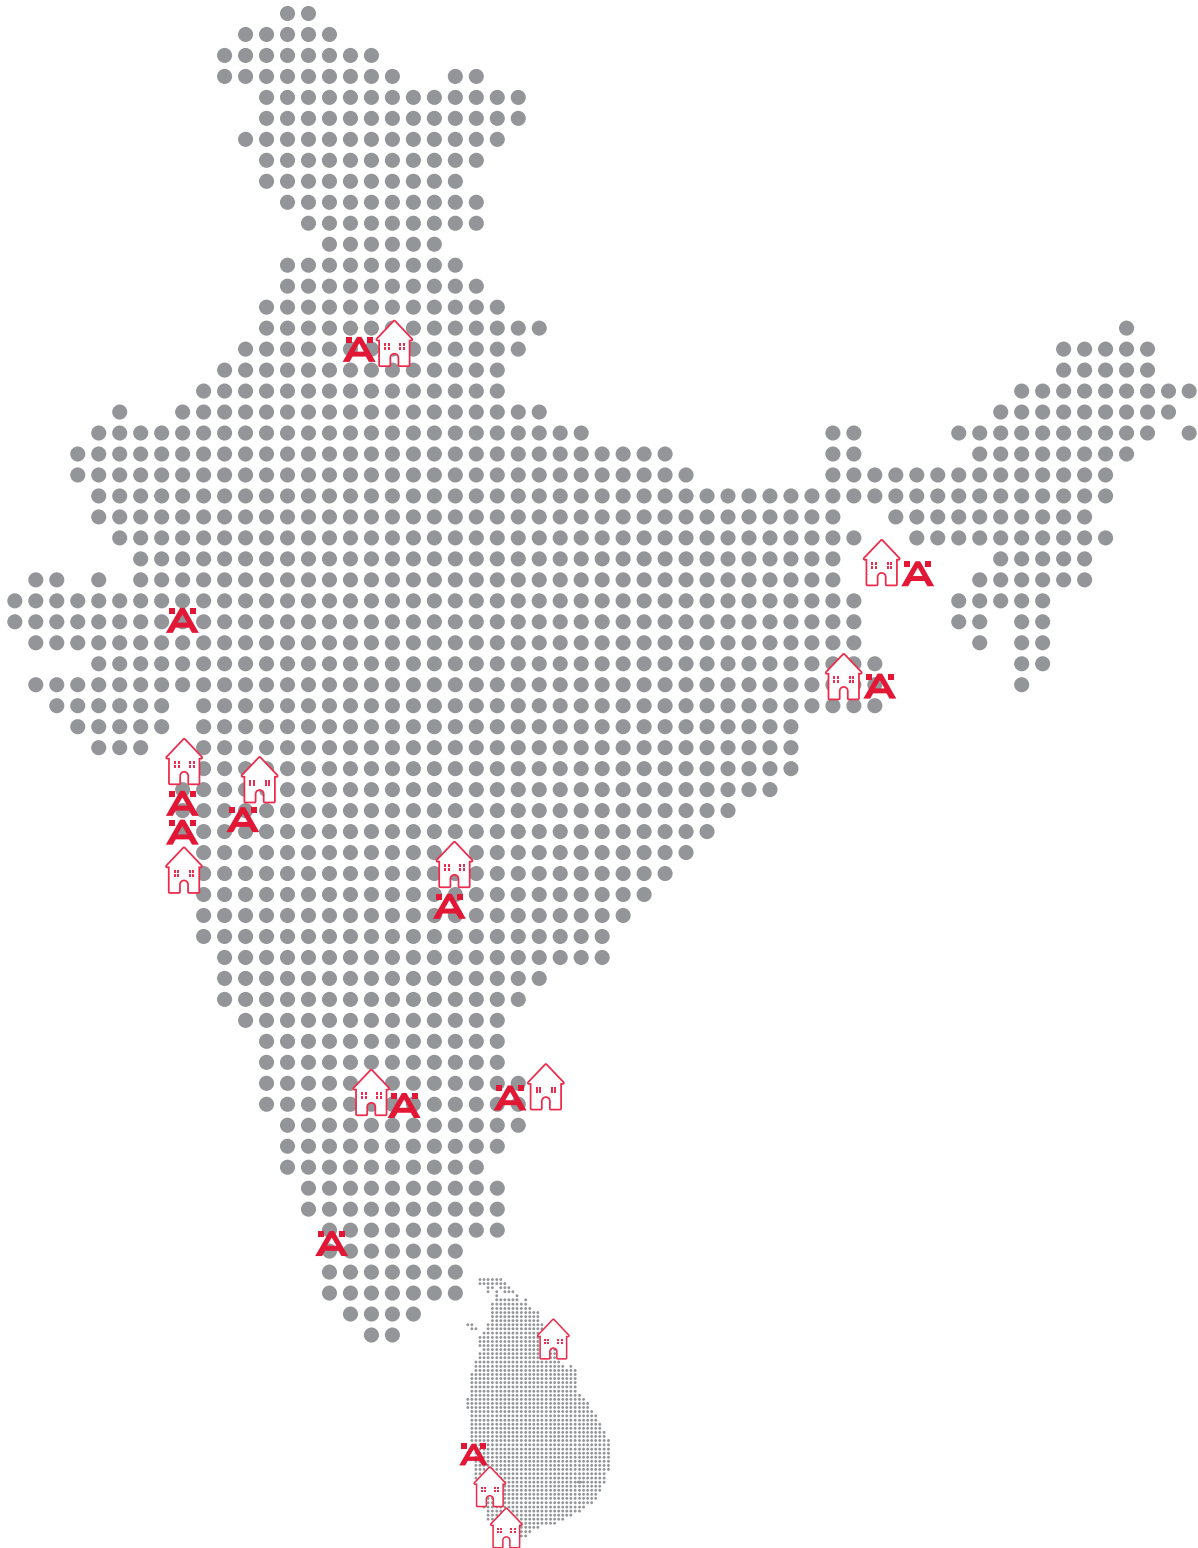

Hafele Worldwide

With its origin in 1923 in a small town named 'Nagold' from the Swabian region of Germany that nurses a passion for hardware technology, it is no surprise that Häfele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for over 9 decades now. Today, Häfele's worldwide penetration includes 38 subsidiaries across Europe, America, Asia, Australia and New Zealand. With these subsidiaries and numerous other sales organisations, Häfele operates in over 150 countries. The Häfele headquarters, 4 manufacturing units and 10 sales offices are located within Germany; while 1 manufacturing unit is located at Budapest, Hungary. The company also owns one of the largest and most sophisticated warehouses in its home country. The Häfele worldwide workforce is empowered by a base of over 8100 employees.

The group services over 150,000 customers across the globe through its extensive range of hardware products and a comprehensive logistics system. In addition to this, Häfele also provides consultative services to its customers, educating and advising them about buying the correct hardware as per their requirements. With this level of market penetration and ability to handle worldwide demand, it comes as no surprise that the company is an authority in the segment of home interior solutions; what is pleasantly surprising, though, is that in spite of its size, Häfele still remains a family owned and run business with a unique, friendly and value-centric work culture which is strongly followed among all its subsidiaries.

Hafele India

 Head Office & Regional Offices

 Hafele Design Showrooms

Häfele India is a wholly-owned subsidiary of the Häfele Global network and has been operating in India since 2003 under the leadership of Mr. Jürgen Wolf (Managing Director). The ability of the company to understand the diverse Indian market has made it an authority in the field of architectural hardware, furniture and kitchen fittings and accessories. The company also has a strong presence in synergized product categories namely Home Appliances, Furniture Lighting, Sanitary and Surfaces catering to the focused demand from these industries.

The subsidiary has a strong nation-wide presence with offices in Mumbai, Pune, Ahmedabad, Bangalore, Chennai, Hyderabad, Delhi, Kolkata and Cochin. It has full-scale operations in Sri Lanka and Bangladesh with Regional offices and Design Showrooms in both the countries; and has also spread its operations to other regions of South Asia including Nepal, Bhutan and Maldives.

Häfele's design showrooms are hubs of international home interior trends and cutting edge designs presented in a world-class environment, where customers can see home solutions in their inherent applications. These showrooms function as a one-stop-shop for all home interior and improvement needs - from providing in-depth technical advice to kitchen and wardrobe designing services through a team of experts stationed at the showroom.

Häfele India services its customers with a base of over 1300 employees, a well-networked Franchise base of over 130 shops along with over 1000 dealers situated across South Asia. The subsidiary has a sophisticated Logistics centre in Mumbai along with distribution centres in Delhi, Bangalore, Kolkata and Colombo respectively.

HAFELE SHOWER ENCLOSURES

Bespoke designs
for your
individual needs

Homes are a reflection of an individual's tastes and lifestyles; and as you go into the more intimate areas of a home, like a bedroom or bathroom, the resonance of these areas with the owner's innate style gets all the more stronger. This is why Häfele has always respected the need for individualistic choices that our customers may have and come up with the most exacting solutions for them, making every experience as

unique and different as possible. Taking this proposition a step further, Häfele now offers you the choice to have the most intimate and personal shower enclosure in your bathroom that singularly meets your specific needs or requirements.

HAFELE SHOWER ENCLOSURES: DESIGN SERIES

Häfele's Shower Enclosures can be chosen from a multitude of configuration options offering an individualistic, bespoke design that truly represents your unique sense of style whilst realistically meeting your precise requirements. Flip through the next few pages to view our Shower Enclosure Design Range which includes the **HARMONY** (simple enclosures without doors), **MYSTIQUE** (complex angular structures with swing doors) and **IMPERIAL** (enclosures with sliding partitions) Series.

A modern bathroom featuring a Häfele Harmony Shower Enclosure. The enclosure is made of large glass panels held together by a thin metal frame, creating a seamless look. The shower area is set against a wall of dark, textured stone tiles. A large window with white horizontal blinds is visible on the left, and a contemporary geometric pendant light hangs from the ceiling. A dark, patterned rug is on the floor in the foreground.

HARMONY

As the name suggests, Häfele's Harmony Shower Enclosure Design offers a harmonious amalgamation of aesthetics with functional excellence. These enclosures are installed with sturdy glass sheets that are joined together with quality-assured connectors or header bars or Aluminium profiles from Häfele depending on whether the need is for frameless or framed designs. These door-less enclosures leave an aperture opening for convenient movement into and out of the enclosure giving you more freedom of access whilst giving your bathroom an overall seamless elegance that's hard to match!

HAFELE

MYSTIQUE

Bringing you perfect synergy in design, aesthetics and functionality are Häfele's Mystique Shower Enclosures. You can create the most contemporary options under this design theme using symmetric or angled connectors to achieve straight or angular enclosures, respectively. Mystique Shower Enclosures give you a separate shower area within your bathroom where a hinged door completely closes the enclosure and demarcates the wet area from the dry one giving you an unhindered bathing experience. The use of Häfele seals further ensure that there is no flow of water from the enclosure into the dry areas of the bathroom.

The background image shows a modern bathroom interior. The wall is covered in white marble with gold veining. Two oval mirrors with dark, textured frames are mounted on the wall. Two pendant lights with white spherical bulbs and gold-colored stems hang from the ceiling. Below the mirrors, a wooden vanity holds two white, bowl-shaped sinks with dark faucets. A large window on the right side of the image shows a view of trees outside.

IMPERIAL

Häfele's Imperial Shower Enclosures offer you the most seamless designs where "continuous symmetry" forms the key. These enclosures are ideal for compact settings where you may not have enough floor space in the bathroom as they can be easily opened and accessed with a straight sliding door. These space-optimizing enclosures offer unhindered operational and functional convenience and yet look regal and elegant, fitting in beautifully with the overall design theme of your bathroom. Once they are completely sealed with Häfele's Sealing systems, these enclosures provide air-tight compartmentalization of the wet area from the overall dry areas of the bathroom.

HAFELE SHOWER ENCLOSURES

Complete solutions where quality is the key

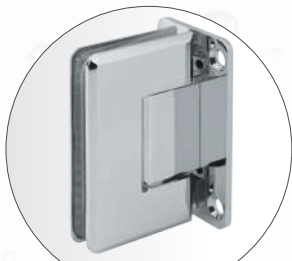

Being an expert in hardware, Häfele offers maximum assurance of quality and performance for all the fittings and components used in our shower enclosures, from the glass panels to the connectors and hinges or sliding gear (depending on whether the application has a swing or sliding door) to the seals and other accessories. Adding our range of shower fittings to this offering, we provide a holistic proposition that may be hard to resist.

To the style and design possibilities of our shower enclosures, we bring the years of trust you have had in us for adding unmatched functionality (or as we call it "life") to your furniture and home applications - functionality, that is backed by true German quality and innovation! After all, you could only imagine what a sheer waste of design a lifeless heap of glass sheets would be, without the right connectors, hinges and accessories needed to really make it a fully functional shower enclosure!

Shower Enclosure Hinges

Distributing the bathroom space into individual havens of peace and tranquillity has never been easier! Häfele's Shower Enclosure Hinge Range features pure, essential designs that are a perfect fit for your bathroom. This range comes in three design series – Bellini (Brass), Kaaza (Stainless Steel Grade 304) and Alda (Brass). The hinges in each series are uniformly aligned in aesthetics and design to provide you with sturdy applications that are indifferent to humidity and corrosion. With sophisticated finishes, Häfele's Shower Enclosure Hinges are engineered to provide functionality with appeasing aesthetics. Whether you want straight lines, or smooth curves or just a stellar looking combination in-line with the other fittings, you are likely to find your best bet from within this range!

Sliding System

What better way to separate the wet and dry area of the bathroom than with a shower enclosure equipped with a modern, robust sliding system. Echo, Häfele's straight sliding system offers you a possibility of building a shower enclosure together with a fixed glass wall. With a cut-to-size track, the resulting cubicle can be as spacious or compact as desired according to the space available. The whole system, made of Stainless Steel 304 is sturdy and corrosion resistant promising system stability and durability. All the components of Echo are available in two finishes, the classic Stainless Steel Polished and the understated Stainless Steel Matt. A handle matching the finish of your choice is provided along with the Echo Shower Sliding Kit to bestow a uniform look.

Connectors

When it comes to a glass enclosure installation, sturdiness of the structure is of paramount importance, but does robustness imply the absence of aesthetics? Häfele's Range of Connectors helps strengthen the glass structure and provides a secure hold on the fixed glass panels. These connectors, when paired with our shower enclosure hinges, bestow an elegant, seamless look to the bathroom.

Header Bars

An alternate to connectors, Header Bar Fittings by Häfele impart a clean distinctive look to the shower enclosure without compromising on its structural stability. The header bar runs overhead, across the length of the enclosure with the glass panels sustained with adequate supports that latch themselves onto the bar. Shower Enclosures installed with Häfele's Header Bars bring about a sharp linearity and subtle elegance to the bathroom.

Shower Systems

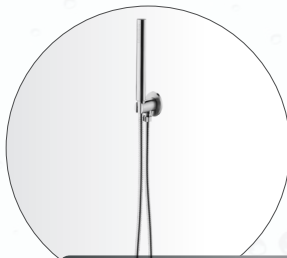

Ever-lasting durability, ultimate sophistication and incomparable manufacturing quality define the Bath Concepts by Häfele. The fittings within these collections create an ambience of refined functionality in bathrooms, providing tranquility, peace and space. Although different in design and structure, the JEE-O Soho, JEE-O Slimline and HIX Bath Concepts by Häfele, at their heart, follow the principle of product longevity and functional luxury. The fittings within these series are made of Stainless Steel Grade 304 and Brass, and as a result are extremely sturdy and long lasting.

Häfele's JEE-O Soho Series is characterized with a dark, all-weather hammer coating which grants your bathroom the right industrial look and emphasizes on maximal minimalism. The fittings from Häfele's JEE-O Slimline Series, slim in form and style, are designed as contemporary art pieces to suit modern bathroom spaces while the HIX Bath collection by Häfele is crafted with sophistication in mind and exhibits converging lines that form the most graceful curves.

Shower Seals

While enclosures with swing and sliding doors effectively demarcate the bathroom into the wet and dry zone, it is the seals that ensure that the dry zone remains so. Häfele's Range of Easy-to-fit PVC and Magnetic Seals provides a strong grip and most importantly plugs the small gaps between the shower enclosure door, the floor and the wall or fixed glass panel thereby sealing the water in! The seals from this range also effectively ease the impact on the glass door when shut with force, reducing friction and safeguarding the glass installation.

Having Häfele as your project partner offers you a completely smooth and peace-of-mind experience. Our knowledge and expertise in building materials, hardware and project specific solutions give us an edge over others when it comes to understanding specific project requirements and executing the most suitable (and customized) solutions. Every Project we undertake is backed and supported by a team of experts who handle everything – from aligning solutions to floor plans, taking site measurements, installing the hardware and components precisely as per the technical norms, doing inspections and supporting our clients with any kind of after-sales service requests.

We have it all covered. Our motive transcends mere commercial and transactional associations – we want to build relationships with our clients and help them walk the length of every project and then continue to service them even after the project is completed. And this is how we ensure a peace-of-mind experience for our clients.

HAFELE: YOUR PEACE-OF-MIND PARTNER

Services from specification to designing to installation

01

Specifying Solutions and Creating Quotations:

Our DipGAI certified team and specification consultants understand the exact requirements of a project and then outline the entire project scope by suggesting the most suitable solutions. These solutions are then expressed in the form of a detailed Quotation by our team of Estimators who include every single detail about the solutions specified and send it to the client for their approval. Through this service, we aim to achieve complete project alignment between the requirements at hand and the solutions that Häfele has to offer.

02

Creating Mock-ups:

Bringing our product specifications and estimates to life and giving a more realistic understanding to our clients, our technical team creates Mock-ups for different solutions recommended for the given project. Through these mock-ups we give a tangible idea to the client about the functionality, quality and technical capabilities of our solutions. This service plays a crucial role in giving complete assurance to our clients that the solutions that will be executed at large for the project function exactly as per the standards specified by us; this is also a stage where our technical team accounts for the realistic on-ground challenges that the given site may present during the actual execution phase.

03

Taking Site Measurements:

Before executing the project, our technical team does a complete site inspection and takes proper site measurements. Through this service, we address the unique customizations that may be needed for the given project and this aids us in accurate installations while also accounting for any specific variations.

04

Creating Technical Drawings:

Basis the Site Measurement and the client feedback on the mock-ups created, our trained designers then get into the creation of detailed technical shop-drawings for each type of application requested by the project client. These drawings indicate the accurate placement of all Häfele hardware products as well as the other accessories and complementary solutions so that a complete understanding of the overall functionality can be visually expressed to the client.

05

Installation:

On obtaining necessary approvals from the client on the Technical Drawings as well as the overall functionality of the mock-ups, our trained technical installers then go on site and execute the entire project by physically installing every solution as per the quotation and drawings. We always recommend that Häfele's technicians do the installation for every project to ensure that the products are installed accurately and can function exactly as per the technical operating standards. A good installation guarantees the most optimum product functionality and also ensures maximum durability and operational sustainability.

06

Quality Checks:

Post the installation is completed, a Häfele representative does a detailed quality check together with the Site Supervisor to ensure that the products are accurately installed and are functioning as per the defined standards.
